

CONTENTS PAGES VOLUMES 41-50

Volume 41

Australian Region (19th)

Propagation media and rooting cuttings of <i>Eucalyptus grandis</i>	41:36
Aboriginal food plants, their propagation and interest for today's nursery Trade	41:40
Integrated pest management for greenhouses	41:44
Twin scale propagation of amaryllis bulbs	41:50
The rooting of <i>Daphne odora</i> Thunb. Cuttings in a hydroponic propagation system	41:53
How to commercially graft grevilleas for profit or preservation.....	41:57
Phase change materials for solar heating of greenhouses	41:59
Walnut propagation using bench grafting.....	41:64
Optimizing root initiation by controlling exposure to auxin	41:68
In vitro factors affecting plant-out performance of micropropagated plants.....	41:74
Mechanisation of the tubing operation in a commercial propagation nursery.....	41:80
Simple methods of micropropagation.....	41:83

New Zealand Region (20th)

Mechanization of open ground seedling production.....	41:92
Towards improved quality in cut <i>Boronia</i>	41:95
Watering container plants five different ways	41:98
Propagation of pittosporums by cuttings	41:103
Propagation notes for some new and novel crops introduced into New Zealand.....	41:104
<i>Worsley rayneri</i>	41:110
Effect of container size and media volume on the growth of plantlets in vitro	41:111
Field trial results of <i>Acacia melanoxylon</i> from tissue culture	41:116
Polyanthus, <i>Primula xpolyantha</i> , breeding.....	41:120

Region of Great Britain and Ireland (24th)

Quality is the key	41:124
Stockplant manipulation for better rooting and growth from cuttings.....	41:127
First quality plants - can the societies play a role?	41:131
The development of a market-led propagation system	41:134
Compost and nutrition in nursery stock production.....	41:142
Developments in the nursery stock industry of Eastern Europe.....	41:146
The nursery stock industry in Greece	41:150
Quality and environmental issues of nutrition, pest and disease control	41:153
Plant health and the single European market	41:157

Training - a key to quality	41:159
The next generation - stimulating an interest	41:163
Quality management - the impact on production	41:166
Specialization - is this the future?	41:169
Plant promotion - what is its value and role.....	41:171
Propagation at Monrovia Nursery	41:173
<i>Eucalyptus</i> trees in India.....	41:176
G.B.&I. Region seminar series: propagation	41:179
G.B.&I. Region seminar series: training.....	41:180
Understanding the market.....	41:182
Marketing - planning for profit	41:186

Western Region (32nd)

Welcome.....	41:190
Curtis J. Alley Award of Merit	41:190
How to be market-driven	41:191
The target seedling concept: potential marketing tool.....	41:196
Unique methods for marketing new plants	41:200
Using the computer for customer service	41:204
Grass seed production in the Willamette Valley, Oregon.....	41:208
Producing virus-indexed liner plants for small fruit production.....	41:211
Propagation of filberts by stem cuttings	41:214
Mechanization in bareroot shade and fruit tree production.....	41:219
Propagation: necessity is the mother of invention.....	41:221
Ideas for efficient production of container-grown plants.....	41:224
Crop water requirements of container-grown plants	41:229
Micro-sprinklers.....	41:232
Wheel line irrigation systems.....	41:235
Drip irrigation in containers.....	41:235
Rainguns as an irrigation option	41:236
Drip irrigation on slopes	41:238
Drip-tape.....	41:239
Integrated Pest Management in forest nurseries of the USDA Forest Service.....	41:240
IPM monitoring systems for nursery production.....	41:245
Entomopathogenic nematode use in nurseries and greenhouses	41:249
Diagnosis of <i>Phytophthora</i> using ELISA test kits.....	41:251
The use of pheromones in pest management	41:255
Propagation of Oregon's rare and endangered plants.....	41:261
Implications of propagation techniques on landscape performance	41:266
Comparison of propagation methods on red maple.....	41:270

Understocks for rare <i>Acer</i> Species	41:272
Harvesting of bare-root nursery plants	41:276
Effect of slow-release fertilizer rate on root and shoot growth of container-grown <i>Kalmia latifolia</i> 'EIP', 'Freckles', and 'Goodrich'	41:278
Germination of madrona seed	41:283
Germination of <i>Cornus canadensis</i> seed	41:286
Correlation of phenolics with etiolated and light-grown shoots of <i>Carpinus betulus</i> stock plants.....	41:290

Southern Region (16th)

Fertigation and nitrogen movement in field nurseries	41:298
Recycling runoff water for irrigation.....	41:302
Environment-friendly plant production system: the closed, insulated pallet.....	41:304
Polyethylene recycling	41:308
Innovations in container production.....	41:313
Breaking the language barrier	41:316
Dogwood anthracnose research program.....	41:319
Propagation under the pines.....	41:322
The effects of selected herbicides on propagation of chestnut oaks in containers.....	41:325
Gibberellic acid, scarification, and scarification treatment for quicker germination of fringetree seed.....	41:330
Outdoor mist propagation	41:335
Back to the basics in propagation.....	41:338
Container tree and shrub propagation and production in Oklahoma	41:343
Cleft Grafting of <i>Magnolia grandiflora</i>	41:345
Germplasm program at the USNA	41:347
Straight line sticking.....	41:350
The acclimation of tissue cultured plants.....	41:352
Propagating vs. Selling liners: can you sell what you propagate.....	41:354
A look at propagation at a diversified nursery	41:356
Germination of doubly dormant woody ornamental seeds	41:359
Fire ants: research activities and new regulations	41:365

Eastern Region (41st)

Welcome.....	41:372
Hardy geranium and perennial propagation.....	41:373
Seed priming for improved germination in herbaceous perennial plants.....	41:376
Micropropagation of <i>Alstroemeria</i> hybrids.....	41:380
Propagating Herbaceous Perennial: More Than Meets the Eye	41:385
Propagation and production of three Ericaceae family members: <i>Epigaea repens</i> , <i>Gaultheria procumbens</i> and <i>Vaccinium vitisidaea</i> var. <i>minus</i>	41:392
The Effect of Organic Soil Amendments, on the Grow and Development of <i>Kalmia latifolia</i>	41:395
Organic wastes as growing media.....	41:399
Comparison of IBA to KIBA.....	41:404

Topophysis in gymnosperms an architectural approach to an old problem	41:406
Understanding foliar variegation as it relates to propagation.....	41:410
Development and dispersal of some woody plant seeds.....	41:416
New markets for native plants	41:419
IPM: how it is done at Studebaker Nurseries, Inc.	41:422
Nutrient runoff from nurseries - is it a problem?.....	41:428
NPURG - a computer program to assess risk of pesticides to ground and surface water	41:432
Environment-friendly plant production system: the closed, insulated pallet.....	41:436
Use of spunbonded fabric grow covers in deciduous seedling production	41:437
Liner shipping	41:439
<i>Cornus kousa</i> var. <i>chinensis</i> 'Milky Way' and Name Recognition in the Nursery Industry	41:441
Use of paints and preservatives in the greenhouse	41:443
Effect of mixes on seed germination	41:445
Controlling melon aphid in greenhouses	41:446
Effects of quaternary ammonium compound dips on rooting of <i>Rhododendron catawbiense</i> 'Boursault'	41:448
Specimen conifer production	41:450
Seedling production at Bailey Nurseries.....	41:453
Does IBA inhibit shoot growth in rooted cuttings?	41:456
Development of double flowering (petaloid) lepidote rhododendrons	41:462
Rooting double white French hybrid lilacs - powder vs. Liquid IBA.....	41:465
Propagation of new Japanese maple cultivars	41:468
1991 research grant award	41:472
Fellow recipients - Eastern Region.....	41:472
Award of Merit	41:472
Taxol update	41:474
An update on trademarks and cultivar names	41:477
New breeders' rights legislation in Canada	41:480
New plant forum	41:483
Eastern Region question box	41:488
Effects of water quality and water management on the growth of container nursery stock	41:492

Volume 42

Australian Region (20th)

<i>Bougainvillea</i> propagation.....	42:37
Stimulation of seed production in <i>Eucalyptus</i> by Paclobutrazol application	42:39
The effects of shoot age on root formation of cuttings of <i>Eucalyptus grandis</i> W. Hill ex Maiden	42:43
Propagation of rainforest plants	42:48
Grafting techniques	42:51
Collection and evaluation of Australian plants	42:54

Phosphorus and the Proteaceae	42:58
Fruit tree propagation	42:61
Treatment of plants with hypochlorite solutions	42:65
<i>Grevillea</i> propagation.....	42:68
Hydroponic propagation of <i>Aglaonema</i>	42:70
Assessment of wetting agents for use in nurseries	42:73
Water quality in propagation	42:81
A review of materials for propagation media.....	42:85
Coal ash as a propagation medium.....	42:91
Commercial application and mass rearing of beneficial insects for integrated pest management	42:95
Plant protection - management of pest control techniques.....	42:99
Prospects for IPM in greenhouse ornamentals in Australia	42:103
Control of two-spotted mite by predatory mites.....	42:108
Deflasking micropropagated plantlets	42:114

Region of Great Britain and Ireland (25th)

New fire blight and scab resistant pyracanthas	42:119
<i>Cotoneaster dammeri</i> : fire blight (<i>Erwinia amylovora</i>) resistant cultivars in Germany	42:123
The assortment of ornamental tree and shrub nurseries in Poland	42:125
New cultivars of ornamental trees and shrubs from Poland.....	42:128
Predicting graft incompatibility in woody plants	42:131
Careroot cell-grown liners and understocks from seed.....	42:135
Progress in controlling disease in hardy nursery stock	42:137
New plants from Hungary tolerating urban conditions.....	42:140
Introducing and promoting British Columbia's native plants for the urban landscape.....	42:142
Breeding woody ornamentals in Sweden.....	42:145
A new rockwool based growing medium for container plant production	42:149
Breeding and selection of hardy woody plants in Bavaria.....	42:152
Successes and failures of marketing - the blooms experience.....	42:154
The commercial exploitation of new plants	42:157
Launching new plants - a liner producer's job?	42:161
Ways municipalities use new plants: how we work in Nantes	42:163
New plants for amateur gardeners - a retailers view	42:164
New plant introductions - the European scene.....	42:166
Production and marketing of roses in the U.S.A.	42:169

IPPS- Denmark (1st)

The influence of juvenility on plant propagation	42:175
Why we are using micropropagated plants	42:177
Possibilities and disadvantages of genetic variation.....	42:178

Micropropagation and plant health.....	42:180
Artificial seeds in micropropagation	42:182

Western Region (33rd)

Challenges and opportunities for plant propagation in a changing world.....	42:187
Propagation by root cuttings	42:194
Cutting propagation of <i>Chamelaucium</i> cultivars.....	42:196
Towards 2000 - development and propagation of new plant material.....	42:200
Site of action of auxin in adventitious root initiation	42:202
Plant variety protection.....	42:206
Propagating some native California perennials.....	42:210
New and interesting native cultivars and their propagation	42:214
Treeshelter use in producing container-grown and landscape-grown trees.....	42:221
Physiological testing of plants as a management tool	42:225
Two practices to help ensure nursery tree quality	42:231
Critical wind blowdown studies for container crops using Cal Tech wind tunnel facilities	42:235
Effect of slow-release fertilizers on propagation medium and on rooting and growth of cuttings	42:238
An overview of integrated pest management for plant propagation	42:242
Making the change to integrated pest management	42:246
Resources for establishing an IPM program for ornamental plants.....	42:251
Recycling green nursery waste.....	42:256
Water conserving irrigation systems	42:260

New Zealand Region (21st)

Plant variety rights and plant production - help or hindrance?.....	42:269
Indexing for dasheen mosaic virus in <i>Zantedeschia</i> species	42:273
A critical analysis of the status of rose wilt virus.....	42:278
The New Zealand citrus budwood scheme	42:283
Micropropagation of <i>Nerium oleander</i>	42:288
Propagation of cherimoya (<i>Annona cherimola</i>).....	42:290
The development of cutting propagation of <i>Camellia reticulata</i> hybrids	42:295
The influence of watering, shading, and nitrogen levels on the growth of container-grown <i>Schlumbergera xbuckleyi</i>	42:297
Mass propagation of <i>Smilax oldhami</i> Miq. by tissue culture	42:304
Development of a prototype automated cutting and placing system for tissue culture multiplication.....	42:309
The role of the plant propagator in the conservation of New Zealand plants.....	42:314
Is horticulture in New Zealand environmentally friendly?	42:318
<i>Agathis australis</i> : a new era for kauri propagation.....	42:321
Cryopreservation of <i>Pinus radiata</i> embryogenic tissue.....	42:327

Southern Region (17th)

Is green good enough?.....	42:337
Container tree production at Trail Ridge Nursery	42:340
The “Benlate syndrome” and what to look for.....	42:343
Container nursery nitrate nitrogen runoff: a six state summary	42:345
Hiring and keeping good employees	42:348
“New” plants/”old” plants	42:352
Budding and grafting of fruit and nut trees at Stark Bro’s.....	42:354
Propagation of southern perennials	42:357
An inexpensive propagation structure	42:360
Update on root-promoting chemicals and formulations.....	42:361
Fog propagation of rhododendron using bottom heat.....	42:366
Dwarf yaupon, weeping yaupon, and azalea propagation at Flowerwood Nursery, Inc.	42:369
Propagation of Japanese maples by softwood cutting and grafting	42:373
Propagation of <i>Nandina domestica</i> cultivars at Tawakoni Plant Farm.....	42:375
Use of composts in nursery potting substrates.....	42:376
New herbicides for ornamentals.....	42:381
Chemicals used during propagation at Cottage Hill Nursery	42:384
Use of insecticidal oils and soaps for pest control.....	42:385
Safety programs to satisfy the right-to-know laws	42:388
The Texas rose industry.....	42:391
Planting a positive future - an overview of three national tree planting programs	42:394
In vitro propagation of modern roses	42:398
Container size during propagation and transplant date influence growth of two <i>Ilex</i> species.....	42:403

Eastern Region (42nd)

Welcome.....	42:411
In vitro culture and micrografting of white pine meristems.....	42:412
Micropropagation of select deciduous trees and shrubs	42:415
Micropropagation of eastern redbud (<i>Cercis canadensis</i> L.)	42:417
Effects of lighting and CO ₂ enrichment on acclimatization of micropropagated woody plants	42:421
A survey of plant tissue culture laboratories in North America	42:427
Evaluation and propagation of lacebark elm selections by hardwood and softwood cuttings.....	42:431
Grafting viburnums: new ideas and techniques.....	42:436
Grafting of junipers	42:439
Propagation of the temperate woody flora of Mexico	42:442
Composting leaves for potting mix	42:447
The use of composted rice hulls in rooting and potting media	42:449
Is eastern Europe a useful source of new landscape plants for the Midwest?	42:451
Market driven plant selection and production - from sales representative or customer input	42:456
Eight witches’-brooms of <i>Acer palmatum</i> and their propagation	42:459

Propagation of <i>Ligustrum vulgare</i> L. by forced softwood cuttings	42:462
Drought stress on scion wood	42:465
Propagation of <i>Cotinus coggygia</i> 'Velvet Cloak'	42:465
Propagation methods at Berthold Nursery	42:466
Freeze damage on <i>Taxus</i> cutting wood.....	42:468
Overwintering rooted cuttings of <i>Viburnum carlesii</i>	42:468
Feeding cuttings to a slow death	42:469
Mist nozzles that work for us.....	42:471
In vitro root suckering of aspen (<i>Populus tremuloides</i>).....	42:472
Seedlings versus tissue-cultured <i>Kalmia latifolia</i> : the case of the missing burl.....	42:476
Clonal propagation of biofuel trees with emphasis on silver maple	42:483
Production of recommended species of ornamental grasses	42:488
Advances using indole-3-butyric acid (IBA) dissolved in water for - rooting cuttings, transplanting, and grafting	42:489
Cell pack production of perennials by tip cutting: the green leaf method.....	42:493
Propagation of daylilies, hostas, and astilbes.....	42:495
Successful cutting propagation of <i>Hamamelis xintermedia</i> 'Arnold Promise' and <i>Hamamelis mollis</i> 'Brevipetala'	42:497
Propagation of <i>Corylus avellana</i> 'Contorta' from root suckers	42:499
Video as a training/educational tool in plant propagation laboratory exercises	42:500
Integrated disease management - research and development using new techniques and bioremediation at Vans Pines	42:503
Reduction of nitrates in nursery surface and ground water.....	42:507
Sex identification in dioecious woody landscape plants	42:513
Awards luncheon:	
1992 research grant award	42:517
certificate of appreciation by Steven Still	42:517
International Award of Honor by John Machen, Sr.....	42:517
Fellow recipients - Eastern Region by Tom McCloud.....	42:517
Award of Merit - Eastern Region by Richard Bosley	42:518
Taxol - update 1992	42:519
New plant forum	42:522
Eastern region question box session.....	42:526
Abnormal growths on micropropagated elepidote rhododendrons.....	42:530
Excellence in our educational environments.....	42:535

Volume 43

Australian Region (21st)

The adventitious rooting of vegetative cuttings using hydropropagation	43:41
Protea stock plant nutrition	43:48
Inspecting a plant for problems: what to look for	43:55
The propagation of Australian native plants from cuttings at the Australian National Botanic Gardens (ANBG)	43:60

Introduction to Growing Perennials from Seed	43:64
The future - computer applications	43:67
New alpine plants to propagate	43:71
Propagation of mint (<i>Mentha</i>)	43:73
Hop propagation in Australia	43:77
Timber species propagation	43:81
Crop scheduling: a business practice or a customer service?	43:86
The use of composted tree chippings as a potting medium	43:89
Using artificial light in plant propagation	43:95
Effects of reduced humidity and paclobutrazol on acclimatisation of tissue-cultured plants	43:97
Hostas in Australia	43:103
Propagation and growth of the tree dahlia - some observations	43:105
I.P.P.S. and the creation of a new Australian botanic gardens	43:107
Is IBA an effective promoter of root formation on cuttings of <i>Eucalyptus grandis</i> ?	43:109
The production of evergreen azaleas in a sub-tropical climate	43:114
Government regulations and nursery accreditation	43: 117

Region of Great Britain and Ireland (26th)

Dormancy release of tree and shrub seeds using a compost activator pretreatment	43:125
Cost of production in commercial micropropagation and research strategies	43:131
Learning from changes in the marketing of plants	43:141
Plug production for seedlings	43:144
Some recent advances in vegetable and flower seed technology	43:146
Digging into composts	43:150
Understanding vegetative propagation	43:157
Magnolia propagation	43:163
Fuchsia options	43:167
Developing crop protection strategies for the nursery	43:170
The botanical gardens of Russia and her neighbours	43:173
Rhododendron propagation - methods and techniques carried out in the Pacific Northwest of the U.S.A.	43:178
Plant improvement and nursery production techniques in New Zealand	43:183
Determination of the cotoneaster collections in three European botanical gardens.....	43:185

IPPS-Denmark (2nd)

Fungus and relative humidity	43:189
Photosynthesis in cuttings during rooting	43:189
Production of seedlings	43:190
<i>Kalanchoe blossfeldiana</i>	43:190
Temperature - DIF	43:191
Shading of plants	43:194

Biological process control in greenhouses: a physiological approach	43:196
---	--------

Western Region (34th)

Effect of nitrogen on blueberry and juniper grown in a fish waste compost: fir bark medium	43:201
Disease control in the propagating house	43:205
The potential for chemical root pruning in container nurseries	43:208
Using “limiting factors” to design and manage propagation environments	43:213
Question period I	43:218
Question period II	43:220
Intensive cultivation of <i>Taxus</i> species for the production of Taxol®	43:222
New and outstanding plants	43:228
Intermittent sprinkler irrigation reduces water loss from container-grown plants	43:240
Reduction of nitrates in nursery surface and ground water	43:244
Effects of biocontrol agents on plant growth	43:249
A protected diffusion zone (PDZ) to conserve soluble production chemicals	43:253
Using manmade snow to protect outdoor perennials	43:258
The commercial propagation and production of fuchsias at Tamborine Mountain	43:259
Strategies in commercial micropropagation	43:261
Exciting New Peony, <i>Hosta</i> , and <i>Hemerocallis</i> introductions	43:267
Perennial production at Valleybrook Gardens Ltd.	43:268
Question period IV	43:272
The history of the flower bulb industry in Washington State.....	43:275
Flower bulb growing and forcing	43:280
Vegetable seed production in Washington State	43:282
Production of Douglas-Fir, <i>Pseudotsuga menziesii</i> (Mirb.) Franco, rooted cuttings for reforestation by Weyerhaeuser Company	43:284
Field propagation of light sensitive species by seed	43:289
It’s good business to buy recycled	43:292
Direct stick rhododendron production	43:293
Plastic lumber	43:294
Trying hard to stay small	43:295
The use velcro strips for rooting	43:296
High density <i>Actinidia xdeliciosa</i> production in a climatically controlled environment	43:297
Propagation of Pacific Northwest native plants from seed	43:299
Propagation of red raspberries	43:301
Plant pot recycling in the greater Seattle area	43:302
<i>Wisteria</i> propagation by root cuttings	43:304
Question box	43:305
Native woody shrub propagation three key steps.....	43:311

New Zealand Region (22nd)

History of Ardmore Nurseries Ltd	43:315
Propagation of acacias and eucalypts	43:317
Restoring a lowland forest remnant	43:320
The design and development of Seaview's propagation facility	43:325
The flora of the New Zealand subantarctic islands	43:327
A personal view on staff relations and training	43:330
Production and propagation of American ginseng (<i>Panax quinquefolium</i>) in North America a New Zealand perspective	43:333
Propagation, industry and education	43:340
Capillary beds - my experience	43:343
Propagation of rootstocks by trench layering	43:345
New Zealand plant collection register: an update	43:348
A review of kuri (<i>Agathis australis</i>) nutrition and assessment of current nursery container mixes	43:350
The production of <i>Robinia pseudoacacia</i> 'Frisia'	43:357
Grafting <i>Ilex dipyrrena</i> - how to repeat beginners luck!	43:358
<i>Populus wilsonii</i> and <i>Populus lasiocarpa</i> - root grafting trials	43:359
Regeneration of sweet pepper (<i>Capsicum annuum</i> L.) from axillary bud induction in vitro	43:361

Southern Region (18th)

Summary of evaluation of new containers for nursery production	43:369
Minimizing loss in <i>Rhododendron</i> and <i>Pieris</i> production	43:372
Update on fungicides	43:373
Using copper compounds to modify roots on container-grown trees	43:376
Making profit from the swamps	43:380
What's new in the biology of adventitious root formation	43:382
Meshing perennial plant production with woody plant production	43:385
Vegetative propagation of three plants with commercial potential, <i>Averrhoa carambola</i> L., <i>Gevuina avellana</i> Mol., and <i>Hillia valerii</i> Standl.	43:389
Propagation of <i>XCupressocyparis leylandii</i> and <i>Magnolia grandiflora</i>	43:393
Variation in sensitivity of azaleas to herbicides	43:395
Storage and production of selected conifers from hardwood cuttings	43:397
Cultivar introductions of <i>Ilex</i> , <i>Pyracantha</i> , and <i>Rhus</i> from Rutgers University	43:400
Effects of growth stage, branch order and IBA treatment on rooting stem cuttings of 'Yoshino' cryptomeria	43:404
Movement, dissipation and impacts of isoxaben (Snapshot TG) in nursery runoff water	43:408
Propagation in school and out - myth and reality	43:413
Growth of three species produced in a pot-in-pot production system	43:418
Wetting agents and gels - where they have a purpose	43:421
Propagation medium moisture level and rooting of woody stem cuttings	43:424
Plant product trends	43:429
Trends in plant product mix: a retailer's perspective	43:431
Plant product trends from the salesman's viewpoint	43:434

Eastern Region (43rd)

Welcome	43:439
Basics of propagation by cuttings - temperature	43:441
Basics of propagation by cuttings: light	43:445
Basics of propagation by cuttings - timing: age-related effects on adventitious root formation	43:450
Using compost on liner beds	43:455
Important considerations for an arboretum propagator	43:457
Fern propagation from spores	43:462
Side shearing to increase shade tree quality	43:464
How we root <i>Taxus baccata</i> 'Repandens'	43:465
Sexual propagation of <i>Taxus cuspidata</i> 'Capitata'	43:467
Rooting second generation <i>Syringa vulgaris</i> cultivar microcutting	43:469
Fog and air circulation techniques to propagate <i>Aesculus parviflora</i> and trifoliolate maples	43:470
Reducing plant stress with shading	43:474
Fertilizers: interactions and overwintering - a review	43:475
New Father Fiala crabapple introductions: field production of own root crabapples from liners to finished stock	43:480
New plant forum	43:481
New large-bracted dogwoods from Rutgers University	43:487
Container nursery plant culture in waxed corrugated cardboard media.....	43:491
Establishing and maintaining a seed orchard	43:495
Evaluation of a chlorophyll meter to indicate relative growth rates of similar plant material	43:497
Question box.....	43:503
Awards luncheon	
1993 research grant award, Fellow recipients - Eastern Region,	43:507
Award of Merit - Eastern Region	43:507
Propagation of astilbe	43:509
The propagator and the computer: the perfect partnership	43:511
Differentiating plant clones in culture and maintaining "virus tested" blueberry clones	43:513
Breeding hardy woody landscape plants.....	43:517
Adventitious root initiation - future research on the site of auxin action	43:521
Alternative methods of cutting sterilization.....	43:526

Propagation of hydrangeas at Half Hollow Nursery.....	45:503
Korean stewartia propagation.....	45:506
Grafting trifoliolate maples.....	45:508
New and unusual plants worthy of use and propagation.....	45:513
Seed propagation: stacking the deck in your favor.....	45:517
Mist propagation of perennials using side or lateral shoots.....	45:519
Question box.....	45:520
New plant forum.....	45:523
POSTER PRESENTATIONS	
Daylilies worthy of commercial production.....	45:529
Effect of microwave treatments on the germination of seeds.....	45:532
An aid to plant propagation and more.....	45:534
Propagation of Allegheny pachysandra by divisions and root cuttings.....	45:535
Environmentally friendly nursery production practices.....	45:536
Black vine weevil.....	45:538
The impact of flowers on adventitious root formation in chrysanthemum cuttings.....	45:540
Lagerstedt hot callusing pipe.....	45:541
Flowering of <i>Rhododendron</i> and <i>Kalmia</i> in response to application date of Bonzi or Sumagic.....	45:543
The propagation of rose stem cuttings in three propagation media.....	45:546
Rooting procedures for <i>Alstroemeria</i> divisions and micropropagated cuttings.....	45:550
The role of micropropagation in the incidence of tissue proliferation in <i>Rhododendron</i> 'Montego'.....	45:552
Utilizing band pots for herbaceous plant production.....	45:554
"To seek and to share"... founding a new I.P.P.S. region.....	45:556
Rooting response of microcuttings of hybrid dogwood.....	45:557
Low-tech fern propagation.....	45:559
Propagation of summer blooming azaleas.....	45:560
Control of root outgrowth by copper hydroxide in capillary mat plug production.....	45:561
Southern Region of North America (20th)	
Welcome.....	45:565
New concepts in improving ornamental plant adaptability with stress-tolerant rootstocks.....	45:566

Fate of herbicides in container nursery runoff	45:570
Irrigation tailwater regulations in the 1990s	45:574
Compatibility of worker protection standards and integrated pest management strategies.....	45:577
Fall fertilization of nursery crops	45:580
Application of Israeli low-volume irrigation technology.....	45:582
Unique bottom heat system for propagation of ornamentals.....	45:584
The controversy continues: comparisons of propagation techniques of <i>Magnolia grandiflora</i>	45:587
Propagation of <i>Magnolia grandiflora</i> cultivars.....	45:591
The importance of propagation to a New Nursery	45:594
Death, taxes, and weeds.....	45:598
Benzyladenine-induced offset formation in hosta dependent on cultivar	45:605
Timing and potassium indole-3-butyric acid treatments on rooting stem cuttings of <i>Cephalotaxus harringtonia</i>	45:611
Field production of <i>Cornus</i> cultivars.....	45:615
Marketing wetland natives and endangered plants under federal and state permitting regulations	45:617
Plants with commercial promise	45:620

IPPS Japan Potential Region (2nd)

A message of congratulations on conference of IPPS

Japan potential region.....	45:625
Drawing a picture on the earth.....	45:625
Environmental control in plug production	45:626
Cultivar differences in shoot proliferation and rooting of Japanese plum (<i>Prunus salicina</i>).....	45:627
Cultivar differences in shoot proliferation and rooting of apricot (<i>Prunus armeniaca</i>).....	45:631
Micropropagation of Venus fly trap (<i>Dionaea muscipula</i> Ellis).....	45:634
Diurnal changes of net photosynthetic rate and evapotranspiration rate of plug sets in the greenhouse.....	45:638
Production of ground cover plants	45:641
Container culture for oak-tree production from seed.....	45:642
Change of root system of trees in container production	45:643
Horticultural production in New Zealand	45:643
Growth and flowering of in vitro propagated <i>Lilium japonicum</i> Thunb.	45:644
Productivity of micropropagated plants and rooted cutting grafts of rose cv. Madame Violet in rockwool culture.....	45:652
Photoautotrophic micropropagation of cymbidium: effects of CO ₂ concentration, photosynthetic photon flux density and sucrose concentration on plantlet growth	45:656
Mass propagation and distribution of rhododendron.....	45:660
Use of PeSp seedlings in production of fruiting vegetables.....	45:660
Micropropagation of mulberry (<i>Morus alba</i> L.) by liquid shake culture of multiple-bud bodies.....	45:661
Accumulation of benzyladenine in green-globular bodies in a micropropagation system for <i>Pteris ensiformis</i>	45:665
Propagation of virus-free sweet potato cuttings by hydroponics in Miyazaki Prefecture	45:668
Some observations on the breeding of Japanese camellia.....	45:669
A try to introduce genes into <i>Zygopefalum</i> by the use of a particle gun.....	45:670

Trial of half-cotyledon selection scheme aided by tissue culture for the acceleration of tea breeding program	45:676
Effects of anti-auxin-like substance containing fluorines and chlorinated indole auxin on seed and vegetative propagation of two species of turf	45:677
Flower production by Japanese in Brazil.....	45:681
Gardening in New Zealand.....	45:681
Propagation of roses and transition of nursery management.....	45:682
SUPPLEMENTS FROM THE FIRST MEETING AT CHIBA IN 1994	
Ornamental horticulture in Australia, the propagators role.....	45:683
Setting up a plant tissue culture laboratory	45:684
Propagation and production of <i>Zantedeschia</i> tubers for export.....	45:685
Propagation of <i>Camellia japonica</i> in horticultural rockwool.....	45:687
Juvenility and rooting potential on the stem cuttings of <i>Pyrus befulaefolia</i>	45:689

Volume 50

New Zealand Region (29th)

New plants for New Zealand's ornamental industries a researcher's perspective	50:43
Something about licorice in New Zealand	50:45
Availability of phosphorus to nursery plants	50:49
<i>Leptospermum</i> : a new image	50:55
Plant diseases forum.....	50:58
Pitfalls in intellectual property agreements for nurserymen and growers.....	50:59
Factors influencing flowering in <i>Metrosideros excelsus</i> (pohutukawa)	50:62
<i>Spinifex</i> research project. A collaborative research project between naturally native New Zealand Plants Ltd. and New Zealand Forest Research Institute.....	50:65
Focus on New Zealand flax: <i>Phormium</i> production in 2000	50:68
Forum: are stock beds being abused?	50:73

Australian Region (28th)

Propagation of vegetables.....	50:79
Fruits of the forest: exploring Australia's tropical rainforests for new pharmaceuticals and industrial chemicals	50:84
New plants for tropical landscapes.....	50:85
Techniques for land regeneration.....	50:87
Grafting of <i>Chamelaucium</i> cultivars	50:90
Tasmanian plants for cut flower, foliage, and food plants	50:94
Tropical tree crops and current research at the department of primary industries, north Queensland	50:96
Mango taxa for wet areas.....	50:102
Issues relating to the properties of potting media	50:105
Grafting in the cultivation of <i>Kumea pomifera</i>	50:109
Nursery exports.....	50:114
AUSCITRUS	50:116

Region of Great Britain and Ireland (31st)

Experiences of growing herbaceous plants for the Scottish market	50:119
The improvement of autumn flowering gentians through breeding and selection	50:123
Vireya rhododendrons in the wild.....	50:127
The establishment of a species collection of vireya rhododendrons.....	50:130
Propagation and cultivation techniques for vireya rhododendrons.....	50:135
Evaluation of novel fungicides and irrigation methods for grey mould control on <i>Calluna vulgaris</i>	50:137
Environmental and quality issues affecting the selection of growing media	50:142
A guide to propagation composts.....	50:148
Experiences with simple propagation on a new nursery	50:152
The provenance and production of Scottish broadleaved trees	50:155
Magnolia propagation in the United Kingdom and the Czech Republic.....	50:162
Experiences with propagation scheduling.....	50:167
A review of <i>Pieris</i> cultivars and their propagation at New Place Nurseries	50:169
Propagating South African trees	50:172
Natural habitats of South African bulbs: implications for cultivation	50:182
South African ericas in the wild: observations from a British Heather Society study tour	50:186
Experiences of <i>Cordyline australis</i> production at Hewton Nursery	50:189

Scandinavian Region (9th)

Make breeding more efficient.....	50:195
Flower breeding in practice	50:198
Breeding and product development by Ex-Plant ApS	50:200
New woody plants for gardening in Denmark	50:202
Genetic fingerprinting. What is it? And what is it used for?.....	50:204

Modern methods for breeding ornamentals	50:209
Intellectual property rights.....	50:218
Propagation aspects of <i>Sciadopitys verticillata</i> and <i>Sequoiadendron giganteum</i> 'Hazel Smith'.....	50:222
Relation between nitrogen status, carbohydrate distribution and subsequent rooting of chrysanthemum cuttings	50:228
Root formation, bud growth, and survival of ornamental shrubs propagated by cuttings at different planting dates	50:239
Routines for quality production of forest plants in container trays.....	50:246
Herbal medicinal products: plant breeding and good agricultural practice (gap) for medicinal and aromatic herbs	50:249
Quality of peat based growing media what is the current status?.....	50:252

Eastern Region, North America (50th)

Welcome	50:259
Genetic engineering of horticultural crops: potential verses reality	50:260
Chicago's ancient ecosystem.....	50:264
Successful techniques for overwintering rooted cuttings.....	50:266
Evaluating the role of pH in the rooting of cuttings: Eastern Region, North America research grant paper.....	50:268
Ideas from the Scandinavian propagator's exchange	50:273
Using electrical conductivity: a possible indicator for the rooting of cuttings	50:276
Niche marketing of native plants	50:281
Improving rooting of several <i>Berberis thunbergii</i> cultivars.....	50:285
Questing for the perfect landscape tree.....	50:287
Can I use municipal waste compost in my propagation media?.....	50:290
Tissue proliferation on rhododendron: a current perspective.....	50:295
Mist nozzle evaluation.....	50:299
Sexual and asexual propagation of Japanese stewartia.....	50:303
Improved adventitious rooting in <i>Quercus</i> through the use of a modified stoolbed technique	50:307
Developing new woody plants at a B&B nursery	50:314
Meet the beetles!.....	50:316
Weed control strategies for liner production.....	50:320
The International Plant Propagators' Society: the early years	50:324
Breeding new selections of repeat blooming daylilies.....	50:330
Unusual <i>Hosta</i> propagation techniques	50:334
Breeding and evaluation of perennials at Chicago Botanic Garden	50:337
The development of <i>Hamamelis xintermedia</i>	50:341
A novel system for propagating <i>Acer rubrum</i> 'Franksred' cuttings without mist	50:346
Prairie flame shining sumac from rooted cuttings.....	50:351
Bamboo for northern climates.....	50:352
Challenges of starting your own liner business.....	50:356
The propagation system used at Wilson Nurseries.....	50:359
New plant forum	50:361
Question box	50:369

Germination of <i>Bletilla striata</i> seed on natural media.....	50:370
Rooting pinkroot.... Then keeping them alive.....	50:372
Engineering heat and flood tolerant birches through grafting.....	50:374
Flood tolerant <i>Prunus</i> through grafting?.....	50:375
University of Connecticut rhododendron introductions.....	50:377
Influence of the timing of propagation and cold storage on the growth and development of <i>Alstroemeria</i> pot plants.....	50:379
How grafting technique on <i>Aesculus</i> can influence healing.....	50:392
Bemheim Arboretum and Research Forest; Eastern Region I.P.P.S. tour site for 2001.....	50:393
The use of Florel as a production tool on various perennials.....	50:396
Asian long-homed beetle: profile of a new pest.....	50:398
Waste-derived media for pot-in-pot shade trees.....	50:400
Propagation by root cuttings and nitrogen nutrition of containerized <i>Anemone xhybrida</i> by root cuttings.....	50:405
Plant introductions from Mt. Cuba Center for the study of Piedmont flora.....	50:406
Root formation in relationship to auxin uptake in cuttings treated by the dilute soak, quick dip, and talc methods.....	50:409
Propagation of pawpaw (<i>Asimina triloba</i>).....	50:413
Field establishment of tissue culture-derived <i>Trillium grandiflorum</i>	50:417
Viburnum beetle: a serious threat to stock blocks, production, and the landscape.....	50:419
Horticultural distance learning: the how, when and why of grafting.....	50:422
Natural seed dispersal and its effects on germination.....	50:426
USDA-ARS NC-7 regional woody ornamental trials.....	50:429
Incorporation of slow-release fertilizer accelerates growth during adventitious rooting of <i>Artemisia</i> , <i>Gaura</i> , and <i>Nepeta</i>	50:430
Restoration of <i>Habenaria radiata</i> grown from seeds in vitro to the native habitat.....	50:433
Timing of low solar irradiance affects <i>Quercus</i> and <i>Acer</i> propagation.....	50:434
Seed germination of <i>Daphne mezereum</i> : fruit stages, cold treatment, and more.....	50:442
Update on fiber pot research at Penn State University: the plantable pot.....	50:445
 Southern Region of North America (25th)	
Welcome.....	50:451
The I.P.P.S. Southern Region 25 years ago: how we got started!.....	50:453
The J.C. Raulston Arboretum at North Carolina State University.....	50:456
Pre- and post-hurricane considerations.....	50:460
Plant breeding and introduction: the necessity for sustained, energetic and visionary programs.....	50:464
Postemergence spurge control in container-grown <i>Liriope</i>	50:466
Extended delivery herbicide.....	50:473
The basics of plant hybridization and improvement.....	50:478
Benefits and opportunities with mycorrhizal fungi in nursery propagation and production systems.....	50:482
Invasive plants and the nursery industry.....	50:490
Propagation at Hanover Farms, Inc.....	50:493
Some exciting new woodies and perennials for zones 7, 8, and 9.....	50:496
Small steps to improving your irrigation system, reducing labor, and increasing your bottom-line.....	50:501

Over-wintering of potted liners	50:506
Winter protection at Schaefer Nursery	50:507
Fiber pots with Spin Out for nursery crop production	50:509
Avoiding the staking dilemma	50:513
Microclimate manipulation for improved plant growth.....	50:522
Weed control in woody liner production	50:528
Expanded polystyrene as a substitute for perlite in rooting media	50:532
Influence of early harvest PGR on the growth of five woody ornamental species.....	50:538
Evaluation of ornamental grasses in south Georgia.....	50:539
Liming and micronutrient requirements for containerized landscape tree seedling production	50:541
Influence of misting interval and hormone concentration for propagation of native azaleas.....	50:546
Mycorrhizal fungal inoculation of woody seed propagation substrate	50:551

Western Region (41st)

The importance of agriculture in our economy	50:559
Questions/answers: general session I	50:560
Developing alternative heat treatments for disinfestation of soil and planting media	50:561
Questions/answers: general session II	50:564
<i>Hibiscus syriacus</i> plant regeneration from callus.....	50:565
The use of shoot tip culture in foundation plant materials service programs	50:568
In vitro cultures and the development of new fruit varieties.....	50:574
Questions and answers: session III.....	50:577
Container stock versus direct seeding for woody species in restoration sites	50:577
Can seed treatments improve germination of (rare) salt marsh species?	50:583
Glacier point restoration project	50:585
Questions/answers: general session IV.....	50:588
Using mycorrhizal fungi during the propagation of woody horticultural crops	50:589
<i>Taxus</i> propagation at Meadow Lake Nursery for Taxol production	50:595
Rooting cofactors: past, present, and future.....	50:598
Question and answer for general session V	50:601
Discovering and patenting a Chinese pistache tree: <i>Pistacia chinensis</i> 'Pearl Street' (plant patent 9,242)	50:602
Using plant growth regulators to eliminate nuisance fruits in ornamental trees.....	50:605
Effects of plant growth regulators on <i>Linaria maroccana</i>	50:607
Plant growth regulator trials on perennial ornamental plants	50:612
Questions and answers: general session VI	50:614
Plant collecting in Mexico	50:615
Ball FloraPlant product development	50:617
Finding new plants for introduction	50:619
Selection and propagation of deep-rooted ornamental trees for urban environments.....	50:622
Questions and answers for general session VII.....	50:632

Meeting in Seattle 2001.....	50:632
------------------------------	--------

IPPS Japan Region (7th)

Greetings to I.P.P.S. Japan from the international president.....	50:637
Recent advances in forest tree cuttings.....	50:638
Utilization of functional water for plant propagation.....	50:643
Effect of surfactant treatments on the growth of vegetables.....	50:645
Systematic cutting ramets production of azalea in Mie Prefecture.....	50:650
Study of the relationship between rooftop planting and plant types.....	50:652
Pot culture of wild rice ('kodai').....	50:657
Development of new selections of eucalyptus trees using genetic manipulation.....	50:659
Micropropagation of <i>Kalmia latifolia</i> and the Use of plant growth retardant for pot-plant production.....	50:663
Micropropagation of garlic (<i>Allium sativum</i>).....	50:665
Some suitable environmental condition for the rooting of <i>Dianthus caryophyllus</i> cuttings.....	50:666
Effect of complex supplements on growth of ophrys seedlings in vitro.....	50:667
A propagation system of statice (<i>Limonium sinuatum</i>).....	50:670
Raising forest seedlings in Vietnam: current status.....	50:671
Effect of high temperatures in summer on the growth of paprika plants.....	50:675
Breeding of new type mum for gardening (ground mum) and its adoption for pot-mum production by PGR treatment.....	50:676
Production of tubers in <i>Cyclamen</i> from somatic embryos.....	50:678
Pre- and post-flasking factors affecting establishment of <i>Cordyline</i> 'Purple Tower' from tissue culture.....	50:681
I.P.P.S.: what it means to us all.....	50:688
Report on discussion "what is I.P.P.S. for?".....	50:690
